

What is claimed is:

1. A simple adhesive tape cutter and marker comprising a marker configured on an adhesive tape roll, wherein the adhesive tape roll is provided with a reel, and an appropriate number of windings of adhesive tape is wound onto a peripheral edge of the reel; the marker is flexible, and is affixed to a side edge of the aforementioned reel of the adhesive tape roll; length of the marker is such to enable encircling any position around a largest periphery of the adhesive tape, and a cutting member is configured on the marker.
2. The simple adhesive tape cutter and marker according to claim 1, wherein the cutting member of the marker is configured so as to form a serrated edge.
3. The simple adhesive tape cutter and marker according to claim 1, wherein a fixing member is configured at one end of the marker, and which provides for affixing to the reel of the adhesive tape roll thereof.
4. The simple adhesive tape cutter and marker according to claim 1, wherein the marker is configured and integrally molded with the reel of the adhesive tape roll.
